GAY/HUMAN RIGHTS REPORT™

Here is a current overview report on the state of the world for our people - gay individuals and straight allies - to educate and share with others.

■ STATE OF THE WORLD

Out of 8 billion inhabitants, 3.42 billion live in regions that at least meet the simplest requirements of civil society, while 4.58 billion do not.

The best places strengthen families by protecting all family members from discrimination based on sexual orientation, while the worst regions violate the human rights of family members based on sexual orientation and therefore violate the right of all parents to have the human rights of their children protected.
